

CAL Engines for the Safe Transportation of Airplane Engines

June 25, 2015 Tel Aviv, Israel -

After successfully transporting hundreds of engines every year, CAL Cargo Airlines announced today the launch of "CAL Engines" - a dedicated product for the safe transportation of airplane engines.

CAL Cargo is applying decades of experience in transporting every size and type of aircraft engine around the world. CAL Engines leverages CAL's fleet of 747-400's original freighters, which can accommodate even the largest engine. And since the CAL team is qualified to deal with dangerous goods, they also service non-purged engines.

CAL provides a safe and protected corridor from point of origin to point of destination, including pickup through ground transportation, ground handling & storage, air freight and delivery via road feeder services. CAL Engines covers every aspect and point in the transport with a dedicated SOP per engine type, including loading, unloading, aircraft and RFS.

For AOG cases, the CAL team offers tremendously fast response times, including "must ride" service, expedited customs clearance and transit time, as well as charter options.

"As an airline, we are especially sensitive to the importance and delicate requirements of engine transport and AOG. Over the past few years our business in the engine segment has increased by an average of 25% per year, testament to our good service and repeat customers" said Eyal Zagagi, CEO of CAL Cargo Airlines. "CAL Engines is the 7th product in our portfolio of solutions for non-standard cargo, all of which embody our slogan 'Challenge accepted'. Our entire operation is built to service non-standard cargo, including specialty products for live animals, dangerous goods, pharma and perishable items, artwork, valuables and other oversize and overweight cargo".

The launch of CAL Engines comes one month after the release of CAL VAL – a proprietary product for the transportation of artwork and valuables.

About the CAL Group

Established in 1976, the CAL Group proudly maintains three areas of expertise: (1) CAL Cargo Airlines- an all-cargo airline; (2) LACHS - Ground handling services in Liege cargo airport; (3) Trucking services throughout Europe and the USA. The CAL Group specializes in unique, complex, and time and temperature sensitive cargo requirements such as pharmaceutical and healthcare products (CAL PHARMA), live animals (CAL LIVE), non-standard shipments (CAL BIG), dangerous goods (CAL DG), perishables (CAL FRESH) and valuables (CAL VAL), CAL Engines.

Its main hub, located in Liege, (Belgium), provides immediate accessibility to all of Europe. Services include scheduled routes as well as ad-hoc and charter missions.

CAL is a private company owned by Mr. Offer Gilboa as the controlling shareholder and Viola Credit Fund as a minority shareholder. It maintains offices worldwide as well as a strong network of GSA's.
